Do I have a bad card? Can a Thief steal from someone else while THEY are in combat? I think they unbalance the game. I got the Raincoat (for Munchkin Quest) as a promo card, and it doesn't match the Raincoat I friend just played in our game. If I charm the Sparky Good Fairy instead of killing her, do I get the two Fairy Dust cards as well as the four Treasures? (Beware the Thief 1 Thief - he literally has nothing to lose!) Q. Is it a Class or what? Does that mean the card Necronoocicon is exempt from that? It's a mini-expansion that doubles as a demo set. It would be, except that the card itself says it is not. No rule that deals with one also deals with the other, you may only have one at a time unless you have an ability that lets you have more, and so on. The player should see the card immediately. What if I somehow have multiple Steeds? No, you can unequip, sell, or discard individual cards any time you need to (subject to the usual discard rules, of course). But Bad Feng Shui also lets you switch non-equivalent cards (e.g., an Item for a Class). I have several promo cards and I'm not sure how to use them. Does the Everything Burrito count as a baked good for Tree Trunks? If they catch you, of course, you do suffer the Bad Stuff from those Monsters. Monsters win ties, unless at least one of the munchkins in the fight is a Warrior or you have some other card that says you do. But if you have a card that makes you immune to level loss for other reasons, you can choose to lose the level and then not lose the level after all. Return to: Top of Page | Table of Contents Game Changers Q. What about Clerical Error in the Dungeon of Comprehensive Curses? Draw three more face-up Treasures and discard Hoard! Distribute the now-larger Treasure pile according to the agreement you made with your helper. Then the universe notices that you have gained three levels and Closes the Seal you just opened. And that assumes you can kill it. How does that work? What happens? Does that include Death? No. Minimum of zero Gold Pieces (this is official errata). No, just Bad Stuff that specifically says to lose Items, Styles, Trainings, and Powers are all distinct (as noted in the Munchkin Impossible and Cheat With Both Hands rules). I heard some people talking about a "backpack," but I can't find that term in my rules. If there's a specific side mentioned on that ability, use that specific side and make the other side match it. Very few cards in Munchkin actually cancel the effects of another card, as though it never happened. You are that agent for this game. BMO also cannot have its gender changed, because there's no gender there to change. I suffered the Bad Stuff from the Clocktopus, but no one here has a watch or a clock. If I lose a Ship that has a Ship Enhancer on it, what happens to the Enhancer? No. You've already paid the cost of the ability by discarding your hand. Those are set icons, designed to let you separate your sets and to tell where a card comes from if you want to look at this FAQ or the errata page for that game. James Bomb says to fight him with only my Level and not my Items. Can a Thief steal from someone while neither he nor his victim is in combat, but someone else is? Wrong. If you find a card that lets you pull any card from the discards, you can choose to pull Reversal of Fortune if you have already used it. After that, you can resume Cursing as normal. By now, we figure most people have the corrected cards (or never had the misprinted ones and don't care), so we dropped them here. Exactly what do you get when you equip it? What if I don't have to give Charity? You cannot have a "naked" Super Munchkin card in play, even briefly. However, unlike many similar cards, you may discard it as one of the three required discards to power itself. If I'm fighting multiple monsters, when does the taming happen? (This has been ruled different ways at different times, but we got a ruling directly from Steve, so it is official.) Q. No. You've already charmed her. Return to: Top of Page | Table of Contents Munchkin Oz Q. This doesn't make you lose Super Munchkin*. Is this the same as the Riggid Demo? You may want to put your name or initials on the front of your cards so you can pull them back out of the discards, unless you've bought something that is meant to stay shuffled into your own game or into a group-owned game. If I play a card such as Wand of Downing that lets me put Hoard! in my hand, what happens? You must make your combat strength equal to or lower than his. How many different level counters can I use in one game? Correct. If I'm playing an Epic Cleric and use my ability to take a card into my hand, does this count as drawing a card for the Dungeon of GM-Y Generosity? Do I have to discard the Suit to avoid the Curse before rolling for its effect? Can you clarify the timing on the Scientist's Atomic Transmutation ability? Does this mean you aren't reprinting the individual booster packs? but O'Ryan is one of them. For this, you get levels and Treasures. Is an Item the same as a Treasure card? It's part of the Hellknight. What happens to a Level 1 Thief who fails an attempt to steal? Any card that requires you to play another card with it (like Wandering Monster) counts as two cards, not one. That seems excessive. It can be lost to Curses, even if the Item says it can't. "Give me that Item I want," "give me my choice of one Item from the Treasure rewards," "help me for free next time I ask," and "go buy me that super-expensive fizzy drink I like" are all valid bribes. The munchkin must still try to defeat the monster. Vehicles are Steeds. Items and Treasures are frequently confused. ALL HAIL KING TORGI! I'm a Citizen of Easter Town. If the Ambassador's neighbor has an Antimattered Ship, does the Ambassador get the unmodified bonus or the Antimatter version? But so can everyone else. My store doesn't have it! A. This rule does not apply to voluntary helpers, who should have thought harder about what they were getting into. Does Curse! Tiny Hands prevent me from carrying an Item that requires 2 Hands, or just from equipping it? Does this mean that I can't play cards to help myself? It doesn't really seem fair that I have to play it before anyone else puts out. If I have a sore throat, can I whisper instead? Return to: Top of Page | Table of Contents Promo Cards, Bookmarks, and Coins Q. However, we have published some cards that say PROMO on the back, and you may choose to start with one of these in your hand, replacing a randomly dealt card of the same type (Door or Treasure). If I'm facing two monsters do I discard two cards or four cards? The easiest way to think about Cheat! is to ignore the Item and Cheat! attached when you are figuring out whether your character is legal. Then play it immediately. But if you don't kill it, you don't get its level and Treasures, even if you do kill all remaining monsters! (And you can't go back for it after the main fight is through, it's Stoned, not stupid!) Q. Steeds are Vehicles. Even if I'm winning, can I just choose to Run Away? What about an ebook? This is a good reason not to announce your plays until you are ready to make them! Curses! Reminder: Everything here also applies to Traps and Disasters. What do you mean by cards in play? The games themselves are the same (apart from being Deluxe sets, which some games had not before), only the art is different. The rules say one thing. Human, while a Race, has no Race card, so Dark and High cannot be played on it. Rules Most of the cards in Munchkin have rule effects of one type or another. Mate duplicates monster enhancers, not other types of cards. No. They are metaphysical states of being. Is that still true if I blend this with another set? Otherwise, play the card with disgust to show your contempt for those lucky people who are. Are my rules out of date? Is it killed? Can I unequip one Steed to play another? Item cards are the only cards that can be traded, and, as long as they aren't prevented from being discarded (say, by a Curse), can only be discarded in the following ways: As part of a sale To a special ability of a Class/Race or another card To fulfill the requirements of Bad Stuff or a Curse/Trap/Disaster The Item is Big and you MUST get rid of it (e.g., because your Hiredling died or you are no longer a Dwarf), and there is no one who can take it Q. If it makes you happier to call them Princes, go for it, but the rules apply regardless. If a Solo Zombie fighting alone defeats a monster in some nonlethal fashion, does it draw an extra Treasure? Oops. Can I play Annihilation to cancel a monster I just drew when I kicked open the door? (This is not 100% clear on the card, but it is the intent!) Q. Yes, this rule can be used to the player's advantage. On the other hand, if you force someone to help and they would win the game, they get to stay in. No. It has its own abilities. When we did a major rule update in 2010, we produced this update expansion, which included about 130 of the most-changed cards so people could replace those cards in their existing decks, rather than rebuying everything. Do I understand this right? Place the keys in your rack facing towards you. I've seen that Munchkin Booty also has a British card. Spear and Magic Helmet specifically auto-kills monsters with "Bunny" or "Rabbit" in their names, and none of the Easter Eggs monsters fit that description. Can I just get dirt under the tatts? But if he cannot defeat it, he automatically escapes without rolling for Run Away, suffering no Bad Stuff. If you contrive to die in some other way, too bad. There is no try. The Hellknight Faction combo (that's why it says +5 Bonus at the top of the card). About half of the cards are new in this game, you must flee if you cannot get help from a member of the opposite sex. If another munchkin hits me with a Trap that forces me to lose my Class, does the other munchkin back out of combat? Most of them
are Treasures, but some are Doors. If you draw the Room face-down, you can take it in your hand and play it on someone when they kick down the door (as long as they don't find a Room themselves). Casting Couch gives you the option to have all the benefits and penalties to being a Wizard along with any other Classes) you might be. Because that Item is currently giving you +3, it can be lost to the Caaaaaaaanes. My opponent added a Wandering Monster. It can be played during combat, and it can be used from the hand. Since the entire purpose of that Spell is to grab the Munchkinomicon for yourself, yes, you can. Here you go. Can he do this? Any card that does not normally help monsters is worth +2. When you say any card, what do you mean? The Ghoulfiness card says only your Level counts in the fight, not your Items. Discard the old one(s). Is the initial sex of a character the same as the sex of the player, or can it be chosen? You may start with only one such card per game. Important Note #0: Cards vs. There won't be official Epic rules for any sets that don't already have them, though. We were probably too busy giggling at the awful title. The Style Gaki card text says "It eats your combat bonus skills! Style bonuses are useless against this Gaki." If my Style has an effect instead of a bonus, can I still use that effect? And if another player throws a grenade or something to hurt the monster and assist you, you don't lose your bonus. Does the Spear and Magic Helmet (from Half Horse, Will Travel) automatically kill any of the monsters in this booster? So you add the +2 to get 20, and reverse that to 02, or just 2. What does the Attic mean by drawing a replacement card for the Room? The Brain Class card says "No Fees have special powers or bonuses against the Brain Class!" Does this mean that monster enhancers won't work on monsters that I fight? Can I Curse other munchkins before I roll the die? Does this mean I can play a Go Up a Level card to go from Level 9 to 10? What is the difference between Munchkin Blender and Cheat With Both Hands? Should it also say it affects Dragons? Throw potions at him. Most Munchkin games say this explicitly in the rules, but it's true even if we left it out by mistake. Pick one of them to put it in front of you. It had 17 cards taken from the original Munchkin game, repurposed as a quick demo set, and a bunch of copies of five promos that were designed to be given to people who tried out the demo. For instance, when the Wandering Monster is an Amazon and one player is female? A. No. Cheat! completely negates someone when they kick down the door (as long as they don't find a Room themselves).
