A deep fitted sheet rather than a standard fitted sheet fits a thick air mattress better. Otherwise, checking the dimensions of your air mattress and sheets allows for accuracy. When applying fitted sheets to any mattress, it helps to spread it out as flat as you can. Once a suitable fitted sheet is in place, flip the air mattress over or on its side to pop your mattress over. Then, flip the mattress back over. If the sheet is not fitted properly, it may slide off. To avoid this, make sure that there is some space for the air mattress to empty overnight. Frequently Asked Questions: The tampons are usually more grippy than the air mattress itself and will help to keep the sheets in place. Flat Sheets Although fitted sheets are recommended for air mattresses because of their adhesion, flat sheets work well too, although they obviously won't stand on very easily (and should be used in addition to a flat sheet). leaf).
